Livestock, Poultry and Seed Program,
Quality Assessment Division

TO: Shell Egg Graders

FROM: Roger L. Glasshoff
National Supervisor, Shell Egg Staff

SUBJECT: Export Requirements for Shell Eggs Destined for Jamaica (Table Eggs)

This instruction outlines specific animal health verification, certification, labeling, and shipping requirements prescribed for shell eggs to be exported to Jamaica as table eggs.

I. Product Requirements

- All shell eggs must originate from the United States.
- Hatching eggs, chicks, and poults must originate from flocks participating in the National Poultry Improvement Plan (NPIP) administered by the Animal and Plant Health Inspection Service (APHIS), United States Department of Agriculture (USDA). See Exhibit I. Plant management must provide a copy of the Form VS 9-3 (Exhibit I) demonstrating that the source flock originated from a NPIP monitored breeder flock.

II. Grade Requirements

- Eggs must be graded and certified as U.S. Grade A or better as outlined in the United States Standards, Grades, and Weight Classes for Shell Eggs (7 CFR Part 56). Grade certification may be determined by online or stationary lot grading procedures.
- Product must be processed and packed under USDA supervision in shell egg facilities utilizing either USDA's continuous voluntary resident or temporary grading service.

III. Packing, Packaging, and Stamping

- All corrugated fiber and pulp filler flats used for packing and packaging material must be new, showing no evidence of previous use.
- All packaging and packing materials must be new with no evidence of previous use or damage.
- Each primary container (carton, sleeve, etc.) must be approved by the National Office prior to printing.
- Shipping containers must be identified with the official plant number, date of packaging, and the USDA Graded for Export stamp with applicable certificate number.
- Pallets must be new or good used (clean and free of adhering foreign material).

IV. Shipping Case Label

Printed and computer generated USDA Graded for Export stamps located on the shipping case label must be approved by the National Office prior to printing.

V. Transport Containers

- Transport containers used to export table eggs to Jamaica must be determined acceptable and clean for the transport of human food prior to loading. Graders are to confirm the cleanliness of the transport container(s) and document the information on Form PY-75 or 211, as applicable.
- When unsanitary condition(s) are observed in transport container, the grader will notify a responsible plant official of the condition(s). Product is not to be loaded onto the container until the unsanitary condition(s) has been corrected. When this occurs, the grader will document the condition(s) including the name of the processing facility official notified on the applicable worksheet.
- Transport containers must be sealed (company seal) prior to departure from the processing facility. The seal number(s) must appear on the Form PY-210S. If the transport unit has been determined acceptable, the eggs properly labeled, the seal numbers have been recorded on the certificate, and the certified product isolated for shipment, the grader is not required to be present when the loading of the transport unit occurs.
- All table eggs must be stored and transported at a maximum of 45°F (7.2°C) degrees ambient temperature.

VI. Certification – See Exhibits II & III

- Upon confirmation of compliance with the above referenced requirements, Form PY-210S shall be completed describing the certified shell eggs for export to Jamaica.
- All certificates (Form PY-210S) and Disease Free Statements – Other Countries must be typed and signed in blue ink.
- The following statement will be printed in the remarks section of Form PY-210S if the expiration date exceeds 30 days from the date of pack:
“The expiration date declared on the product is the responsibility of the applicant.”
- Plant management must notify the USDA grader of pending export orders, each certification request, and provide the grader the following information:
 - Name of Producer
 - Size of lot to be certified
 - Flock identification and location information
 - If applicable, date product will arrive for processing
 - When product is to be graded and shipped
- The disease free information (See Exhibit V) must be presented with the Form PY-210S at the border entry point.
- The format of the export certificates (Form PY-210S, Disease Free Statements, and any amendment) cannot be changed. Applicants and brokers cannot request additional information to be included on the certificate.

File these instructions as E-31, EXPORTS, in the Supervisors/Resident Graders Shell Egg Index.

Disease Free Certification Statements for Other Countries

Shell Egg Grading Certificate No. SEA - _____ Dated: _____

“The U. S. Department of Agriculture, Animal and Plant Health Inspection Service, Veterinary Services certifies that:

No cases of lethal (highly pathogenic) avian influenza (fowl plague), including the highly pathogenic subtype H5N1, and no cases of velogenic Newcastle disease (VND) have been reported in commercial laying chicken flocks in the county(ies) of origin where the eggs originated for the 6 months preceding departure of this consignment. These eggs were produced in the county(ies) in the state of (state name) identified below:

The shell eggs covered by this certificate were produced by birds originating from Salmonella enteritidis (SE) -certified breeding flocks which have not been identified within 90 days before shipment by the U.S. Department of Agriculture, Animal and Plant Health Inspection Service, as being infected with SE, including SE phage type 4.”
